The inventions are distinct, each from the other because of the following reasons:

Application/Control Number: 09/943,037 Page 10

Art Unit: 1624

B. Inventions of Groups 1-20 are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are unrelated for the following reasons:

- a. The formula (I) in Groups 1-19 are drawn to compounds of various combinations of ring systems. Although said groups share a core of -C(=O)-phenyl, such a core is well known (as evident by the attached CAS printout), and is not applicant's contribution to the art. Thus, the compounds of each group is defined by the ring having Z-Y, and p, in combination with the ring system of $C^1(C^2)_q(C^3)_o$, and the core. It is the combination of said ring systems that gives the compounds in each group their physical and chemical properties that are patentably distinct. Therefore, a reference that anticipated compounds of one group would not do so to the other groups, and thus, a separate search for each group would be required, which would pose a burden of searching.
- b. Inventions Groups 1-19 and 20 are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful to make another agricultural products (as evident by the reference of **Engel et. al.** (WO 99/10327 cited on IDS)), and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants. Should applicant traverse on the

Art Unit: 1624

ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these inventions are distinct for the reasons given above and the search required for Group 1 is not required for Groups 2-20, restriction for examination purposes as indicated is proper.

A telephone call was made to Ms. Michelle Ekanemesang on 11-03rd-03 to request an oral election to the above restriction requirement, but a written restriction is preferred since Mr. Mark Russell (the attorney of record) was not available at the time.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tamthom N. Truong whose telephone number is 703-305-4485. The examiner can normally be reached on M-F (7 am -12 pm, and 3 pm - 6 pm) starting from 10-1st -03).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mukund Shah can be reached on 703-308-4716. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-4556 for regular communications and 703-308-4556 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1235.
